HEAVY DUTY VACUUM FOR INDUSTRIAL CLEANING

Compressed air powered vacuum. Five times more suction power than conventional electric powered vacuums. Generates extremely powerful suction with no motor or moving parts. Generating heads mount on standard 55 or 30-gallon drums, instantly transforming them into high-volume industrial vacuum cleaners. These units will handle your toughest clean-up problems with speed and ease. The suction power created is such that you can pick up virtually anything that will pass through the hose including: dirt, sand, chips, water, oil, nuts, bolts, - anything.

EVERYTHING IN ONE PACKAGE

The COMPLETE UNIT models of Compressed Air Powered Vacuums offer a package which includes everything you need for a wide variety of heavy duty industrial cleaning applications. The most popular hose and tool choices are included along with the drum and wheeled dolly.
