

Wire Rack Scale System-Model ESS-41 and ESS-42

ACE Equipment Company has designed a unique scale system for weighing magnet wire stored on a wire rack. The scale system comes with a meter which allows a customer the ability to weigh and calculate the total amount of wire stored on their wire rack. The scale system can be used with any wire rack that will fit on the scale.

Calculate how much wire you have!

Customers can now know exactly how much wire they have at any time and can easily calculate how much wire has been used for any winding job. The total amount of wire on the rack is weighed.

The meter mounted to the Model ESS-41 and ESS-42 can be zeroed out and used to weigh one pail of wire or 40. The capacity of the ESS Scale System is up to 5,000 pounds.

Dimensions

Model ESS-41 4' W x 5' L x 3" H

Model ESS-42 5' W x 6' L x 3" H
