

COIL WINDING

SINGLE PHASE WINDING HEAD

MODEL No. TL-1500

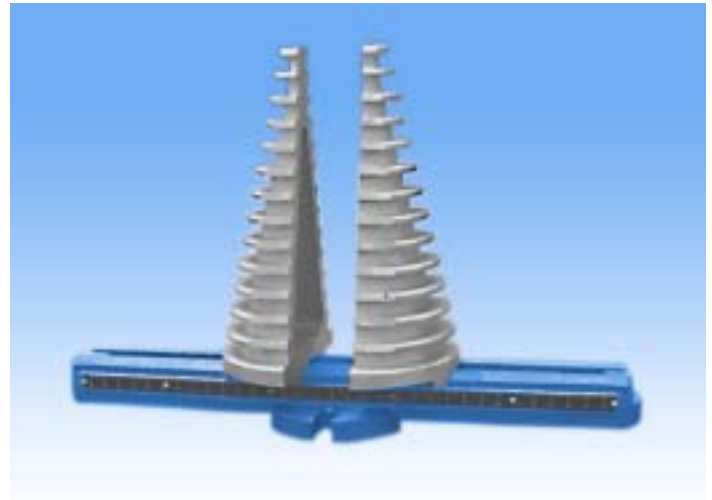

This single phase winding head is fully adjustable for single phase coils from 3" to 13" long...with a choice of 13 widths. Left and right matching polished heads are supplied. An accurate scale (calibrated in $\frac{1}{2}$ " increments) is installed on the side of the base for easy adjustment of the heads.

The opening between the heads is calibrated to match motor slot length in inches.

Forms are selected to fit widths of each coil of the group to be wound.

Tie the wire to the ends of the cone and wind the coils all connected. Tie each coil, release the head, and the coils are ready to use.

The Model 1500 mounts to any coil winding drive with an 18" swing. It has fast set-up, easy to release.

CONSTRUCTION

Cast iron base with two polished aluminum cones. Corrosion protected.

NET WEIGHT	12 Lbs.
GROSS WEIGHT	15Lbs.

Complete Winding Systems

ACE manufactures a complete line of Coil Winders, Accessory Equipment, Burnout and Curing Ovens. See our Website or contact us for more information.....
